

ACTIVITIES

The proximity of the barrier reef makes it a diver's and fisherman's paradise.

Sailors can charter catamarans to explore the hundreds of atolls on the reef. Placencia is strategically located for land tours as well, which bring you to Maya ruins, national parks where nature is overwhelming and caves which you can explore with canoes or tire tubes. Everything is on walking distance in the village, so you are close to shops, supermarkets, restaurants, disco and bars with live bands on different evenings of the week, with some of them accessible on bear feet from the beach.

STUDIOS

Most accommodation in Placencia is basic (guesthouses) or luxurious (resorts). Our masonry constructed apartment villa offers cool and virtually bug-, burglar- & fire free aggressively priced accommodation steps away from the beach and some 500 yards/m from the tourist office. We are located in Harbour Place, the residential part of the village (no night life). In building it in 2007, we put a lot of emphasis on hygiene, safety and comfort. The 4 suites of 330 sqft (33m²), which can cater up to 4 people, have 2 fans, a kitchen with fridge and microwave oven, bathroom with shower, television, Wi-Fi, a queen's bed, a queen futon, a counter and 2 to 4 stools and a table with 2 to 4 chairs for inside and outside use. Air conditioning is available at a small extra cost. Premium studios have their own porch with hammock to enjoy lazy moments after an active day.

The roof top "private" sun deck overlooking the sea, lagoon and Maya Mountains offers breathtaking views and unforgettable sunsets. You can get picked up for your fishing and diving at our dock in the lagoon.

Placencia

The Village

The Placencia peninsula is fast becoming the "Key West" of the western Caribbean which is the home of numerous resorts, hotels and guesthouses and an impressive number of ocean going catamarans. It is an old fishing village with the nicest beach of Belize mainland with high-rise buildings prohibited. The local cabanas along the side walk boarding the beach create a colorful patchwork of shops and restaurants. The climate is subtropical averaging 75 till 81°F. Its mixed population of white settled residents, Mayas, Meztisos and Garifunas is friendly and inviting.
